

# Guard Cote™ PLUS

## ASPHALT EMULSION PAVEMENT SEALER

Guard Cote™ PLUS is a high performance asphalt emulsion pavement sealer with enhanced polymer modification. Unlike other asphalt emulsion sealers, Guard Cote™ PLUS is produced from a specially selected asphalt with our exclusive continuous process colloid mill.

Guard Cote™ PLUS significantly outperforms other asphalt emulsion sealers.

- Preserves and protects asphalt pavements
- Ready to use
- Colloid milled for consistent, trouble free performance
- Compliant with regulations for sealer PAH content

### Durable

Guard Cote™ PLUS exceeds the performance criteria described in most specifications for asphalt based pavement sealers. While it has similar composition to pavement sealers made from SS1-h or CSS1-h, Guard Cote™ PLUS is emulsified in our state of the art process with an asphalt specifically produced for exceptional performance as a pavement sealer. Guard Cote™ PLUS has additional polymer reinforcement and provides superior wear resistance compared to conventional asphalt based sealers.

### Great Value

Seals and weatherproofs porous asphalt surfaces. Helps protect asphalt pavements from oxidation caused by sunlight.

### Consistent

We are the industry benchmark for production consistency and quality control. Every gallon of Guard Cote™ PLUS produced is the same as the the one before. Load to load, year to year. Consistency you can count on.

### Regulatory Compliant

Guard Cote™ PLUS is compliant with any bans or restrictions for coal tar or PAH content. It contains no other restricted materials and typical PAH values are well below 0.1%. Guard Cote™ PLUS is water based and has minimal odor. VOC is less than 50 grams per liter. Guard Cote™ PLUS does not photosensitize the skin like coal tar or petroleum resin sealers.
