

Brewer Cote®

LONGEST LASTING PAVEMENT SEALER AVAILABLE ANYWHERE

Brewer Cote® protects your asphalt pavement like no other sealer can. Left unprotected, your asphalt pavement is damaged and eventually destroyed by water penetration, freeze-thaw cycles and oxidation from the sun. Brewer Cote® seals in the strength and flexibility of asphalt pavement as it seals out the harmful elements that are attacking it. Brewer Cote® restores the deep, black color of new asphalt.

- **Maximum protection for your asphalt pavement**
- **Outlasts and outperforms other pavement sealers**
- **Impervious to gasoline and oil drippings**
- **Colloid milled for consistent, trouble free performance**

Extends

Brewer Cote® prevents pavement from being dissolved by gasoline and oil drippings, oxidized by the sun and broken apart and undermined by water penetration and subsequent freezing and thawing. Brewer Cote® extends pavement life and reduces the need for costly repairs and replacement. Brewer Cote® protects your investment and saves you money.

Beautifies

As asphalt pavement oxidizes it turns gray. Brewer Cote® restores its deep black color. Safety markings and striping stand out and it sheds snow and ice faster. Your parking lot looks more attractive and is safer for those who use it.

Consistent

Manufactured with our proprietary colloid mill process. Brewer Cote® meets and exceeds all Federal specifications for composition and performance.

Resists and Sustains

Brewer Cote® is a 100% refined tar emulsion sealer. Refined tar is impervious to gasoline and oil drippings, weather and the sun's UV rays giving your pavement protection superior to that of other types of pavement sealers. Brewer Cote® is longer lasting than alternative sealers, so you seal less often. Brewer Cote® helps sustain natural resources. Greenhouse gas emissions from related mining and processing operations are over 90% less for installation than for an asphalt overlay.
