MATERIAL SAFETY DATA SHEET

SECTION 1

Product Name: MARKING CHALK GLO-ORANGE

For Information Call: 1-800-345-3766

SECTION II - Hazardous Ingredients of Mixture

SECTION III - Physical Data

- Boiling Point: N/A
- Specific Gravity (H₂O=1): 2.7
- Vapor Pressure: N/A
- Solubility in Water: Negligible
- % Volatile by weight: N/A
- Appearance: Odorless Orange Powder
- pH: 8.6-8.8 (Saturated Solution)

SECTION IV - Fire and Explosion Data

- Flash Point: Non-Flammable
- Extinguishing Media: Use dry-chemical, water or other extinguishing agent suitable for Class A fires.
- Special Firefighting Procedures: NIOSH Approved respirator and protective clothing should be worn. Use water spray to cool equipment and containers.
- Unusual Fire Explosion Hazards: None known.

SECTION V - Health Hazard Data

- Routes of Entry: Skin-Yes, Inhalation-Yes, Ingestion-Yes, Eyes-Yes
- Carcinogenicity: Calcium Carbonate contains crystalline silica at levels between 0.01-2%. There is some evidence that this material may be carcinogenic. Limit exposure to the lowest limit possible.
- Effects of Overexposure:
  - Eye Contact: Irritating to eyes
  - Skin Contact: None noted
  - Inhalation: May cause irritation to the nose, throat and respiratory tract.
  - Ingestion: Harmful or fatal if swallowed.
SECTION V-Health Hazard Data (cont'd)

Emergency First Aid Procedures:
Eye Contact: Flush with warm water, lifting the eyelids periodically for 15 minutes. Consult a physician if condition persists.
Skin Contact: Wash affected area with warm soapy water. If irritation occurs, consult a physician.
Ingestion: Call a physician immediately.
Inhalation: Remove victim from dust area to fresh air and seek medical attention. Give artificial respiration if not breathing. Call a physician.

SECTION VI-Reactivity Data

Stability: Stable Conditions to avoid: None known.

Incompatibility (materials to avoid): Acids, aluminum, fluorine, magnesium, alum or ammonium salts

Hazardous Decomposition Products: Combustion will produce toxic oxides of carbon and calcium oxide, and formaldehyde.

Hazardous Polymerization: Will not occur.

SECTION VII-Spill or Leak Procedures

Vacuum or scoop material into approved containers for reclamation or disposal. If excessive dust is generated, wear NIOSH approved respirator for mineral dust.

SECTION VIII-Special Protection Information

Respiratory Protection: An approved NIOSH respirator should be worn when TWA limits are exceeded.

Ventilation: Use local ventilation to keep dust levels below recommended exposure limits. If exposure limits are exceeded, a NIOSH approved respirator for mineral dust should be worn.

Protective Clothing: Employees must wear gloves.

Eye Protection: Chemical safety goggles or safety glasses with splash guards.

Other Protective equipment: Eye bath and safety shower should be available.

SECTION IX- Special Precautions

Precautions to be taken in handling and storage: Do not store near acids. Follow normal good housekeeping procedures.

Other Precautions: Wash hands thoroughly after handling. Wash contaminated clothing before reuse.

SECTION X- Regulatory Status

TSCA Inventory Status: This material is a mixture, the ingredients of which are on TSCA inventory.

RCRA: This material, when disposed of, is not specifically listed as a hazardous waste according to federal regulations unless it meets the USEPA definitions for being toxic, corrosive, ignitable or reactive, or it is mixed with or comes in contact with a listed hazardous waste. Consult local, state and federal regulations.

California Proposition 65: See Section XI
### SECTION XI-Other Regulatory Information
